

Laura Harvey

I have lived in Kings Hill with my daughter since 2006 and have seen the multitude of positive ways the community has evolved. I realise there will always be issues and frustrations within any community, but I believe proactive discussion and understanding are key to resolving these issues and I am committed to deliver within the remit of the position.

With the opportunity to represent KH residents, I commit to questioning, endorsing, and challenging proposals, with the aim of securing programs and resources which provide value for all residents.

Personally, I work for a global diagnostic health company and have been an active member of our CSR (Corporate Social Responsibility) group which has provided me a valuable opportunity to understand how we can better our communities and our world through service and collaboration with our neighbours.

Clive Henley

Moving to Kings Hill in 2004, a father of three teenage boys and husband of some 20 years. My family have grown up on Kings Hill and have been a keen volunteer in the community for many years. I am involved with or know of all community groups so understand the demographic well, including the pleasure and challenges involved in living in our Parish. I believe, KHREMC generally carry out the task of running Kings Hill very well, but that's not to say it is without problems or improvements to make. One-issue lots of residents talk about, is the lack of transparency and communication, if successful, that is something I will improve for the residents alongside helping protect our environment.

Having had 30 years' experience in business and 25 years directorship, this combined with my passion for Kings Hill uniquely places me to perform in the role of Resident Director.

Leigh Jackson

My name is Leigh Jackson, I have lived on Kings Hill for 6 years and thoroughly enjoy the community. However, during this time, I have observed a number of issues with how the residents and KHREMC dealt with each other, with a perceived lack of transparency from KHREMC.

I believe that KHREMC should be transparent in how they are selecting projects to spend residents' fees on and should be open to discuss issues, especially if there are disagreements.

If selected, I will endeavour to ensure that KHREMC are held accountable for the ways in which the residents' fees are spent and to bring more openness and transparency to the residents' dealings with KHREMC.

James Mackay

I believe that if you benefit from the work of an organisation and if circumstances allow you should be prepared to get involved in the continuation and development of that organisation. I have been a Kings Hill Resident since 2006.

I served as a Student Union President, volunteered in local government initiatives. I served on the committee of Kings Hill Golf Club Men's section and was Club Captain in 2019.

I have connected with local sporting and community clubs including Kings Hill Cricket Club and Kings Hill Community Tennis Club and have been inspired by the efforts, drive and enthusiasm shown by volunteers in these organisations

I have worked for globally recognized brands as well as small family firms and SME's. I have a strong record in delivering change and getting the best out of people through listening and where necessary asking and answering difficult or challenging questions.
